

Cylindrical Mounts

These mountings are simple & versatile isolators of rugged construction for use in wide variety of application to ease misalignment problems; permit relative movement as in vibratory rollers, shifting & grading machine; as well as a mounting to protect instruments & light equipments and isolate heavy machines from the harmful effects of vibration, shock & noise.

Type	Diameter MM	Length MM	Threads MM	Stud Length MM	Load / Kgs	
					Compression	Shear
VCM-1510	15	10	M4	10	15.3	2
