

KRONIC CAR SHOCK ABSORBER/SPRING BUFFER*

A FEW FACTS ABOUT OUR PRODUCT

- 100% Indian Manufactured Product keeping in mind the Road conditions in India with an Indian Patent.

- Our BUFFER is the only product which is Indigenously made in India as compared to the other cheap Imported ones from China.

The Imported Buffers are not Manufactured as per Indian Road Conditions and they don't have an Indian patent nor an approval from ARAI.

Using of such Buffers will certainly cause damage and reduce the life of Coil Spring, Strut Element/Shock Absorber, Suspension Parts, Tyre life and an increase in Fuel Consumption.

- The Indian made Kronic Spring Buffer is made of the highest Grade of High Density Rubber Material which can withstand up to 20 Tonnes of Weight which has already been tested and proved.

- Kronic Spring Buffer increases the life of Coil Spring and Strut Element/Shock Absorber, Suspension Parts, Tyre Life, Engine and Transmission Mounting, Steering Gear Assembly, Road Stability and most importantly reduces Fuel Cost.

-Kronic Spring Buffer makes it a pleasure to drive, whatever the condition of the road may be.

- Kronic Spring Buffer also increases the Ground Clearance by about 1.8 inches which helps in avoiding Underbody Scrapes on uneven Roads and Faulty Speed Breakers resulting in almost zero Underbody damages.

- Kronic Spring Buffer provides great safety in maneuvering sharp turns, improvised breaking and a high level of Road Grip and Stability.

- Kronic Spring Buffer minimises the visits to a Wheel Alignment Centre resulting in additional Savings.

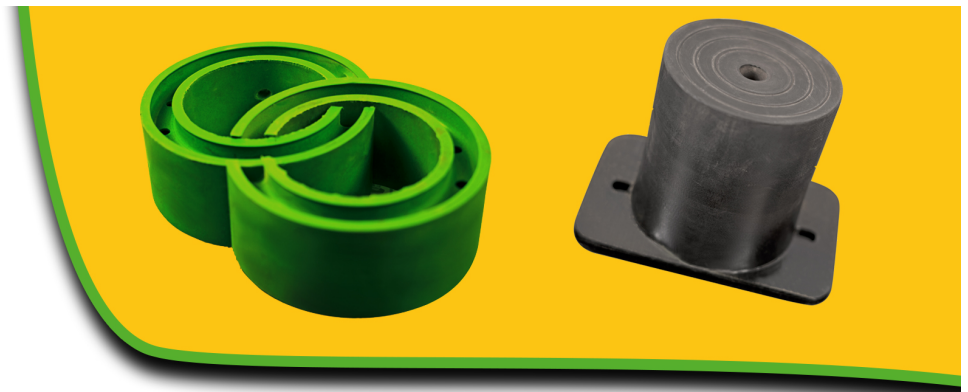

OUR VISION

By using Indian Manufactured Kronic Spring Buffer our Customer must get the best of Protection, Vehicle Stability, Comfortable Drive as well as a Safe Drive resulting in less Maintenance and More Savings.

OUR GOAL
